Veterinärbesiktning

All horses must be inspected at the vet every day the horse shows. Inspection times will be announced. All horses should be vaccinated against the flu. Basic vaccination involves three vaccinations (A + B + C) with an interval of 21–56 days between A and B. After the B vaccination, the horse is eligible for start. Between B and C vaccination, the interval is 90-180 days. After the C vaccination, the horse is still eligible to start. Thereafter, the horse should be revaccinated (R) within 365 days in order to continue to be eligible. To get started it must have been at least seven days since the last vaccination (B, C and R). Example: If the horse is vaccinated on Thursday, it may start on Friday the following week.
